Definite integral:

More digits

$$\int_0^2 \sqrt{1 + \cos^2(x)} dx = \sqrt{2} E\left(2 \middle| \frac{1}{2}\right) \approx 2.35169$$

 $E(x | m)$  is the elliptic integral of the second kind with parameter  $m = k^2$ 

Visual representation of the integral:

Indefinite integral:

$$\int \sqrt{1 + \cos^2(x)} dx = \sqrt{2} E\left(x \middle| \frac{1}{2}\right) + \text{constant}$$
